Introduction

Founded in 1972, the Social Science Research and Instructional Council (SSRIC) is the oldest of the affinity groups in the California State University system. With representatives from each of the CSU campuses, the Council is dedicated to assisting students and faculty in their learning, teaching, and research by:

- Facilitating access to social science data and computer-related instructional and research materials
- Promoting quantitative social science research by students via the annual SSRIC student research conference
- Initiating and conducting training programs
- Recommending computerized social science projects in the CSU curriculum
- Providing a forum for sharing information about social science data and computer products
- Advising CSU administrators on policies related to providing quantitative social science data for research and instruction

Data

The SSRIC is the CSU systems' clearinghouse for social science data, notably data from the Inter-university Consortium for Political and Social Research (ICPSR), The Field Institute and the Roper Center for Public Opinion Research. These data sources provide data to support quantitative social science teaching, research and service by students, staff and faculty, and well as sponsored programs and grant development by CSU research

centers.

All the functions described above are performed by faculty representatives as a service. Dues requested of individual campuses primarily defray data subscription costs.

ICPSR

The Inter-university Consortium for Political and Social Research (ICPSR) is the largest social science data repository in the world. It is the primary source of social science data for every research-oriented university and nearly every other university and college in the United States. Data access is online and interactive under the *ICPSR Direct* system. During academic year 11-12, 11,243 datasets (685.4 gigabytes of data) were downloaded from ICPSR by CSU students, faculty, and staff. These totals represent a substantial increase in usage from 2006 thru 2009. There was a decrease in number of data sets downloaded from 2010-11 to 2011-12 but a slight increase in total gigabytes downloaded over this same time period. The following table summarizes utilization by campus from 2006-07 through 2011-12.

Usage data always requires one important proviso. A single download may be used in a class with many students, but only shows on the usage chart as a single download. Additionally, a single faculty member may download a study to be used for research by multiple faculty members.

Inter-university Consortium for Political and Social Research						
Campus	Total Data Sets Downloaded					
	06-07	07-08	08-09	09-10	10-11	11-12

ICPSR maintains a series of topical archives that allow the user to analyze data using the SDA which was written at UC Berkeley. SDA is an online program that allows individuals to access particular studies that have been set up for this program. The table below shows the number of times that SDA data files in the ICPSR were accessed by CSU campuses. There was a sizable increase in SDA usage in 2011-12.

Fiscal year	Number of times accessed
2006-07	1,369
2007-08	1,310
2008-09	1,454
2009-10	1,501
2010-11	1,311
2011-12	2,611

ICPSR also offers an extensive summer program in quantitative analysis. Our membership in ICPSR allows us to distribute a portion of our membership fee to cover tuition for one participant in the summer program. The following table summarizes the number of faculty and students (primarily faculty) that were enrolled in the ICPSR's summer program from 2006 through 2012.

Summer	Number of enrollees
2006	7
2007	2
2008	7
2009	14
2010	9
2011	7
2012	9

Roper Center for Public Opinion

The Roper Center provides public opinion data for the nation and the world. Studies go back many decades providing the opportunity to do longitudinal research. The CSU established a system wide membership in the Roper Center in October, 2004. From October, 2004 through September, 2005 the CSU was limited to 50 data sets per year and data had to be ordered through one point of contact. Starting in October, 2005, CSU students, faculty, and staff could download Roper data directly to their desktop through RoperExpress (similar to ICPSR Direct). This resulted in a large increase in utilization of Roper data.

The following table summarizes the number of data sets that were downloaded from the Roper Center archive during 2006-07 through 2011-12 by CSU students, faculty, and

staff. In 2011-12, 519 datasets were downloaded. This represents a decrease from 2010-11 but is very close to the number of data sets downloaded in 2009-10.

The Roper Center also offers iPOLL which is a data base of survey questions which can be used for trend analysis and to select data sets for downloading. This table also reports the number of times that students, faculty, and staff used iPOLL. In 2011-12, iPOLL was accessed 3,724 times, representing a substantial increase in usage from all previous years. The following table summarizes utilization by campus from 2006-07 through 2011-12.

Roper Center for Public Opinion												
Campus	Data Sets Downloaded						iPOLL Accesses					
	06-07	07-08	08-09	09-10	10-11	11-12	06-07	07-08	08-09	09-10	10-11	11-12

The Field Institute

The CSU maintains a membership in the Field Institute which provides our students, faculty, and staff access to both current and past Field polls. The Field Institute is one of several state polls that provide current public opinion data for the state on issues of interest to policy makers, researchers, and students. In addition to access to these polls, our membership in The Field Institute provides one faculty member with the opportunity to place 12 questions per year on a Field Poll.

The CSU contracts with UC Berkeley to provide access to the data sets we receive from the Field Institute. The following table provides information on the number of times that students, faculty, or staff accessed the Field archive at Berkeley. The table below shows the number of times that a person logged onto the Field archive to look for or download data for the 2005-06 through 2011-12 academic years. During academic year 2011-12, 1,082 Field data sets were accessed. This is almost identical to 2010-11 and represents an increase compared to 2008-09 and 2009-10.

Student Research Conference

The SSRIC sponsors an annual student research conference for both undergraduates and graduates where students can present their research in a supportive setting. For many students, this is their first opportunity to present their research at a professional conference. The 2012 conference was held in Los Angeles with 52 presentations from 9 participating campuses. The 2013 conference will be held in San Francisco. The following table summarizes student research conference activity for the years 2007-2012.

Student Research Conference			
Year	Host Campus	Student Presentations	Campuses Participating
2007	Northridge	36	13
2008	Long Beach	47	8
2009	Sacramento	43	12
2010	Pomona	33	9
2011	San Jose	14	4
2012	Los Angeles	52	9

Website

The SSRIC Web site is online at www.ssrlic.org. The site consolidates and expands information previously scattered on servers at the Bakersfield, Los Angeles, and Pomona campuses. The new site makes it much easier to communicate information about resources, events, and services provided to students, faculty, and staff through the Council. The site offers among other things:

- Announcements of upcoming events
- A contact list of Council representatives from each campus
- Information for research-oriented social science faculty throughout the CSU
- Comprehensive information about the annual SSRIC Student Research Conference
- Instructions for downloading ICPSR, Field, and Roper data
- Information about the Field Fellowship program
- Information about the ICPSR Summer Program
- Curriculum materials contained in the SSRIC Teaching Resources, including various modules and exercises and an SPSS primer
- Curriculum materials contained in POWERMUTT, an online text for teaching research methods in political science and cognate disciplines.
