## Introduction

Founded in 1972, the Social Science Research and Instructional Council (SSRIC) is the oldest of the affinity groups in the California State University system. With representatives from each of the CSU campuses, the Council is dedicated to assisting students and faculty in their learning, teaching, and research by:

- Facilitating access to social science data and computer-related instructional and research materials
- Promoting quantitative social science research by students via the annual SSRIC student research conference
- Initiating and conducting training programs
- Recommending computerized social science projects in the CSU curriculum
- Providing a forum for sharing information about social science data and computer products
- Advising CSU administrators on policies related to providing quantitative social science data for research and instruction

## Data

The SSRIC is the CSU systems' clearinghouse for social science data, notably data from the Inter-university Consortium for Political and Social Research (ICPSR), The Field Institute, and the Roper Center for Public Opinion Research. These sources provide data to support quantitative social science teaching, research and service by students, staff and faculty, and well as sponsored programs and grant development by CSU research centers.

All the functions described above are performed by faculty representatives as a service. Dues requested of individual campuses primarily defray data subscription costs.

## ICPSR

The Inter-university Consortium for Political and Social Research (ICPSR) is the largest social science data repository in the world. It is the primary source of social science data for every research-oriented university and nearly every other university and college in the United States. Data access is online and interactive under the

ICPSR Direct system. The following table summarizes utilization by campus from 2006-07 through 2013-14.

During academic year 2013-14, 8,764 datasets (568.7 gigabytes of data) were downloaded from ICPSR by CSU students, faculty, and staff. These totals represent a substantial increase in usage from the prior year, which represents the low point in the series. This ended three straight years of decline which may have been due in part to a decline in the number of data base workshops provided to campuses by the SSRIC. This decline is, in turn, the result of a near zeroing out of the Council’s travel budget. The growth was a notable “return to form” for some of the larger campuses (Fullerton, Long Beach & Northridge), which offset declines at other large or medium campuses (notably Los Angeles, Sacramento and San Diego).

In addition, usage data always requires one important proviso. A single download may be used in a class with many students, but only shows on the usage chart as a single download. Additionally, a single faculty member may download a study to be used for research by multiple faculty members.

ICPSR maintains a series of topical archives that allow the user to analyze data using the SDA which was written at UC Berkeley. SDA is an online program that allows individuals to access particular studies that have been set up for this program. The table below shows the number of times that SDA data files in the ICPSR were accessed by CSU campuses. With the exception of the 2011-12 academic year, SDA use continues to slowly grow, with 2013-14 having the second highest usage in the series.

Fiscal year	Number of datasets accessed
2006-07	1,369
2007-08	1,310
2008-09	1,454
2009-10	1,501
2010-11	1,311
2011-12	2,611
2012-13	1,531
2013-14	1,687

ICPSR also offers an extensive summer program in quantitative analysis. Our membership in ICPSR allows us

to distribute a portion of our membership fee to cover tuition for one participant in the summer program. The following table summarizes the number of faculty and students (primarily faculty) that were enrolled in the ICPSR's summer program from 2006 through 2014. The number enrolling in 2014 was the third highest going back to 2006.

Summer	Number of enrollees
2006	7
2007	2
2008	7
2009	14
2010	9
2011	7
2012	9
2013	12
2014	10

### Roper Center for Public Opinion

The Roper Center provides public opinion data for the nation and the world. Studies go back many decades providing the opportunity to do longitudinal research. The CSU established a system wide membership in the Roper Center in October, 2004. From October, 2004 through September, 2005 the CSU was limited to 50 data sets per year and data had to be ordered through one point of contact. Starting in October, 2005, CSU students, faculty, and staff could download Roper data directly to their desktop through RoperExpress (similar to ICPSR Direct). This resulted in a large increase in utilization of Roper data.

The following table summarizes the number of data sets that were downloaded from the Roper Center archive during 2006-07 through 2013-14 by CSU students, faculty, and staff. In 2013-14, 850 datasets were downloaded. The Roper Center also offers iPOLL which is a data base of survey questions which can be used for trend analysis and to select data sets for downloading. The table also reports the number of times that students, faculty, and staff used iPOLL. In 2013-14, iPOLL was accessed 193 times, representing a substantial decrease in usage from previous years. Dataset usage was near its highest point in recent years, yet iPOLL usage is near its lowest. The increase in dataset usage was concentrated at two campuses, whereas decreases in iPOLL usage are across most campuses.

## The Field Institute

The CSU maintains a membership in the Field Institute which provides our students, faculty, and staff access to both current and past Field polls. The Field Institute is one of several state polls that provide current public opinion data for the state on issues of interest to policy makers, researchers, and students. In addition to access to these polls, our membership in The Field Institute provides one faculty member with the opportunity to place 12 questions per year on a Field Poll.

The CSU contracts with UC Berkeley to provide access to the data sets we receive from the Field Institute. The following table provides information on the number of times that students, faculty, or staff accessed the Field archive at Berkeley. The table below shows the number of times that a person logged onto the Field archive to look for or download data for the 2005-06 through 2013-14 academic years. During academic year 2012-13, 360 Field data sets were accessed. This represented a sharp decline from previous years, and most of activity was concentrated at just a few campuses. Usage increased slightly in 2013-14, concentrated at a few campuses (though not the same campuses as in 2012-13.)

The Field Institute									
Campus	05-06	06-07	07-08	08-09	09-10	10-11	11-12	12-13	2013-14

### Student Research Conference

The SSRIC sponsors an annual student research conference for both undergraduates and graduates where students can present their research in a supportive setting. For many students, this is their first opportunity to present their research at a professional conference. The 2013 conference was held at San Francisco State with about 30 presentations from about 8 participating campuses. The 2014 conference was held at CSU Fullerton. The following table summarizes student research conference activity for the years 2007-2014.

Student Research Conference			
Year	Host Campus	Student Presentations	CSU Campuses Participating
2007	Northridge	36	13
2008	Long Beach	47	8
2009	Sacramento	43	12
2010	Pomona	33	9
2011	San Jose	14	4
2012	Los Angeles	52	9
2013	San Francisco	30*	8*

2014	Fullerton	79	16

### **Website**

The SSRIC Web site is online at [www.ssrlic.org](http://www.ssrlic.org). The site consolidates and expands information previously scattered on servers at the Bakersfield, Los Angeles, and Pomona campuses. The new site makes it much easier to communicate information about resources, events, and services provided to students, faculty, and staff through the Council. The site offers among other things:

- Announcements of upcoming events
- A contact list of Council representatives from each campus
- Information for research-oriented social science faculty throughout the CSU
- Comprehensive information about the annual SSRIC Student Research Conference
- Instructions for downloading ICPSR, Field, and Roper data
- Information about the Field Fellowship program
- Information about the ICPSR Summer Program
- Curriculum materials contained in the SSRIC Teaching Resources, including various modules and exercises and an SPSS primer for versions 19 and 22.
- Curriculum materials contained in POWERMUTT, an online text for teaching research methods in political science and cognate disciplines.
- Links to various sites that have useful research information.
